

# CORNWALL BAIT

*Confidence behind your rods.*

Cornwall Bait has been running successfully for 5 years now and during this time our customer base has expanded dramatically. The success of the business is based firmly on our core principle of making top quality, attractive and nutritional baits at an affordable price enabling all types of carp angler to use a high quality bait which has an excellent catch record. The list of big carp captures from both home and abroad continues to grow and our baits have been responsible for the capture of 80lb plus carp from France and hundreds of English 30 lb plus fish from a wide variety of waters including South West Lakes Trust lakes.

Our range of baits is small but offers a choice that is diverse enough to cater for all needs from long-term baiting strategies to short session success. Many of our customers have reported their best ever captures since switching to our baits and their loyalty has become vital to our custom.

Increasingly we are being asked to prepare bespoke baits for a range of tackle shops and lake owners both home and abroad and we are proud to be able to offer South West Lakes Trust an exclusive high quality fishmeal bait available in two different flavours which will be available on site at Upper Tamar Lake from the middle of March 2010. This bait has been extensively tested at home and abroad and has an excellent track record of big fish captures. It includes three different fish-meals (including pre-digested), milk proteins, cereals and a couple of unique attractors and enhancers. Rest assured, you will be able to fish confidently if you choose to use either of these baits!

If you want something a little bit different this coming season then why not choose from our range of baits, please take a look at our website [www.cornwallbait.co.uk](http://www.cornwallbait.co.uk) for further information. In the meantime, we hope that all of you have a prolific carp-catching year.
