

Carp restocking update

The Trusts re-stocking policy has continued this summer with Argal being the main benefactor. To date, we have introduced 59 carp averaging just over 10lb with the largest being an 18lb 8oz common. The 65 acre water previously held between 80 -120 carp with many fish well into the 30lb range.

All the current fish are ageing so introducing the new stock will add some more life and variety to the water while releasing some of the angling pressure on the current fish. It is hoped the new fish will grow beyond the current lake record of 42lb 8oz.

This will be an ongoing process during the summer and anyone interested in attending a stocking or who would like some more information please contact Ben Smeeth on 01566 771930 or bsmeeth@swlakestrust.org.uk

5lb Mirror stocked on 19/10/2009

18lb 2oz common stocked on 19/10/2009

17lb 8oz Common stocked on the 28/5/2009

8lb Mirror stocked on the 28/5/2009
